

DK AI Marketplace — Content Policy

Version 1 · Effective 15.08.2026 · Subject to review by legal counsel

This Content Policy applies to every product, listing, description, image, video, and file submitted to DK AI Marketplace ("the Platform", operated by Dari Kastrati, an Einzelunternehmen based in Adligenswil, Lucerne, Switzerland). It sits alongside the Platform's Seller Agreement, Seller Rules & Obligations, and Terms of Service. Where this Content Policy and Section 3 ("Prohibited Products & Content") of the Seller Rules & Obligations document overlap, the more specific or more restrictive provision governs; the Platform intends to consolidate its legal documents into a single canonical source over time.

1. Scope

This policy applies to all Sellers, all submitted products (regardless of delivery mode), all product media (screenshots, demo videos, preview files), and all written content in a listing (titles, descriptions, FAQs). It applies from the moment a product is created as a draft through to its removal or delisting.

2. Permitted Product Categories

Sellers may list digital, AI-related products they have full legal rights to sell, including:

- AI agents and autonomous workflows
- Automations (n8n, Make, Zapier, and similar tools)
- Prompt packs and prompt systems
- Datasets the Seller is licensed to distribute
- Templates (documents, design files, code scaffolding)
- Digital tools, scripts, and SaaS starter kits
- Educational material and courses the Seller owns or is licensed to distribute
- Custom commissioned work, where the commissioning terms allow resale

3. Prohibited Content

The categories below are illustrative, not exhaustive. The Platform may remove any product it reasonably determines to be harmful, unlawful, or damaging to marketplace trust, even if not explicitly listed here.

3.1 Illegal, malicious, or unauthorized-access content

- Anything illegal under Swiss, EU, or U.S. law, or the law of the Buyer's or Seller's country of residence.
- Malware, viruses, ransomware, spyware, keyloggers, exploit kits, or any tool whose primary purpose is unauthorized system access, hacking, credential theft, or circumventing security or DRM protections.
- Tools built primarily to enable phishing, spam, fraud, fake reviews, engagement/click fraud, or bots that violate a third-party platform's terms of service.
- Tools that facilitate surveillance or stalking of individuals without their knowledge or consent.

3.2 Sexual and exploitative content

- Pornographic, sexually explicit, or sexually suggestive content of any kind.
- Any content sexualizing minors, in any form. Zero tolerance — reported to the relevant authorities immediately upon detection, with no prior warning to the Seller.
- Non-consensual intimate content, or deepfakes depicting real, identifiable people in sexual, defamatory, or otherwise deceptive contexts.

3.3 Violence, hate, and dangerous content

- Content promoting or glorifying violence, terrorism, or self-harm.
- Hate speech, or content that attacks, degrades, or discriminates against people on the basis of ethnicity, nationality, religion, gender, sexual orientation, disability, or similar protected traits.
- Instructions, code, or tools primarily designed to build weapons, explosives, or other dangerous goods.

3.4 Restricted goods and services

- Gambling, betting, or games-of-chance products, and tools that primarily facilitate them.
- Products dedicated to the marketing, production, or trade of alcohol, tobacco, vaping products, or controlled substances.
- Adult-only vice services of any kind.

3.5 Intellectual property and deception

- Counterfeit goods, pirated software, cracked or resold licenses, or anything infringing a third party's copyright, trademark, patent, or trade secret.
- Freely available open-source code or templates repackaged and sold as the Seller's own original work without disclosed, substantial modification or added value.
- Stolen data, leaked databases, or personal data the Seller has no lawful right to sell or distribute.
- Listings that misrepresent what the product does, what it includes, or what results a Buyer can expect — including fabricated reviews, fake benchmarks, or falsified demo material.

4. AI Transparency Requirements

In line with the EU AI Act's transparency obligations and general consumer-protection principles, Sellers must:

- Clearly and accurately describe what the AI product does, its known limitations, and any material risks.
- Disclose, where the product generates content (text, image, audio, or video) for end users, that the output is AI-generated, to the extent required by applicable law.
- Never market a product with false claims of capability, accuracy, certification, or human authorship.
- Apply additional disclosures where the product falls into a high-risk category as defined by the EU AI Act.

5. Working-Product Verification (Demo Requirement)

To deter listings of code the Seller does not actually own or has not actually built, every product must include a short screen-recorded demonstration (a link to an unlisted/shared recording, or an uploaded video file) showing the product genuinely functioning as described. Listings without a valid demo

cannot be approved. A demo alone does not establish ownership or licensing rights — see Section 3.5 — but its absence is an independent ground for rejection.

6. Review Process

Every product is reviewed by the Platform before publication and may be re-reviewed after modification. Submission does not guarantee approval. The Platform may approve, request changes, or reject a listing at its discretion, and may request temporary, confidential, logged, time-limited access to a product or a representative sample to verify compliance with this policy.

7. Enforcement

Violations of this Content Policy may result in, depending on severity and history:

- Rejection of the specific listing, with a note explaining what must change.
- Removal of an already-published listing.
- A formal warning recorded on the Seller's account.
- Temporary suspension of the Seller's ability to publish new listings.
- Permanent removal of the Seller's account.
- Withholding of payouts for orders directly connected to the violation, to the extent legally permitted.
- Reporting to law enforcement or other competent authorities where legally required or, in the Platform's judgment, appropriate — in particular for content described in Section 3.2.

8. Reporting a Violation

Buyers, Sellers, or any third party may report a suspected violation of this policy to support@dkaimarketplace.com. Reports are reviewed on a best-effort basis; the Platform does not guarantee a specific response time outside of its standard support commitments.

9. Appeals

A Seller whose listing is rejected or removed for a Content Policy violation may request a review by replying to the rejection notice or writing to support@dkaimarketplace.com with supporting evidence. The Platform's decision following an appeal is final.

10. Changes to This Policy

The Platform may update this Content Policy from time to time. Continued listing or selling of products after an update takes effect constitutes acceptance of the revised policy. Material changes will be reflected in the version number and effective date at the top of this document.

11. Governing Law

This Content Policy is governed by Swiss law and forms part of the Platform's Terms of Service, subject to mandatory consumer-protection provisions that may apply in a Buyer's country of residence. Place of jurisdiction is the Platform operator's registered seat in Switzerland.

This document is provided as a working draft and is marked subject to review by qualified legal counsel before it is treated as final. Contact: support@dkaimarketplace.com
